CNC Machining Certification Exam Guide: Setup, Operation, and Programming

**ALL THE FOUNDATIONAL SKILLS NEEDED TO BE A
CNC OPERATOR/MACHINIST *IN ONE SOURCE***

CNC Machining Certification Exam Guide is focused on providing the knowledge base required for obtaining certification, credentialing and/or job preparation in CNC Machining with CNC Mills and Lathes. It covers foundational skills that all those seeking employment as a CNC Operator/Machinist must possess. Managers responsible for workforce development in manufacturing facilities will use the book as a guide for on-the-job employee training and apprenticeships.

What's more it can be used as a curriculum component for technical schools and colleges for students preparing for certification and credentialing exams based on the National Institute for Metalworking Skills (NIMS) Machining Level I standards for: CNC Mill Programming and Setup and Operations, and CNC Lathe Programming and Setup and Operations. At a time when the CNC market is experiencing a shortfall of skilled, qualified workers, this Exam Guide is the perfect resource.

FEATURES

- Presents CNC Programming with G-Code so users can execute their programs with confidence.
- Focuses on the creation of CNC programs using Computer Aided Manufacturing (CAM).
- Written with the end goals of certification, credentialing *and* job readiness in mind.
- Practice study questions mimic those presented on credentialing exams and practice exercises prepare readers for the required practical activities.
- **An affiliated website (www.CNCCertification.com) contains additional certification questions and answers, as well as suggested additional exercises.**

TABLE OF CONTENTS

Part I—CNC Machining Fundamentals: 1. Machine Safety; 2. Types of CNC Machines; 3. Machine Maintenance and Workspace Efficiency; 4. Cutting Tool Selection; 5. Machining Mathematics; 6. Understanding Engineering Drawings; 7. Basic Geometric Dimensioning and Tolerancing; 8. Deburring Tools and Techniques; 9. Machined Part Inspection; 10. Basic CNC Program Structure and Format. **Part II—Setup Operation and Programming of CNC Mills:** 11. CNC Mill Setup and Operation; 12. Introduction to CNC Mill Programming. **Part III—Setup Operation and Programming of CNC Lathes:** 13. CNC Lathe Setup and Operation; 14. Introduction to CNC Lathe Programming. **Part IV: Introduction to Computer Aided Manufacturing:** 15. Introduction to CAM for CNC Milling; 16. Introduction to CAM for CNC Turning. **Part V—Preparing for the Certification Exam:** 17. Exam Preparation; 18. Practice Exam.

ABOUT THE AUTHOR

Ken Evans has had an illustrious career working in aerospace and manufacturing as a Prototype Lab Manager, CNC Programmer, Sales Engineer, Instructor, Quality Control Inspector and Machinist Tool- & Die- and Mold-maker. He has more than 20 years of experience using CAD/CAM, more than 20 years of teaching, and is CIM certified. Evans is a published author for Industrial Press (*Programming of CNC Machines* + accompanying *Workbook*, *Interpretation of Geometric Dimensioning and Tolerancing*, 3e), and has been an Advisor of medalists in the Precision Machining Technology area at SKILLS USA.

CNC Machining Certification Exam Guide: Setup, Operation, and Programming
